BACKGROUND VERIFICATION CRM

# Cost and Feasibility

What the AI costs per task and per case, what hosting and services cost each month, and why the system pays for itself.

| AI PER COMPREHENSIVE CASE | AI PER CLIENT ONBOARDING | MONTHLY AT 200 CASES |
|---|---|---|
| **$0.65** | **$0.11** | **$164** |
| LKR 196 · 7 checks | AI-drafted quotation | AI plus hosting and services |

Prepared for
**Ontriq (Pvt) Ltd**

Version
**1.0 · 29 October 2026**

Currency
**USD (LKR at 300)**

Every figure in this document is calculated from the stated assumptions and public list prices checked on 29 October 2026. Real usage is measured inside the system from day one, so these estimates can be compared with actual spend at any time.

1 · SUMMARY

# The short answer

The AI that reads documents, drafts outreach and reports, and runs the assistants costs cents per case. Hosting and services are a small, predictable monthly amount. Both are far below the staff time the system saves.

| COMPREHENSIVE CASE | STANDARD CASE | NEW CLIENT + QUOTATION | STAFF TIME SAVED |
|---|---|---|---|
| **$0.65** | **$0.35** | **$0.11** | **3.0 h** |
| 7 checks, AI end to end | NIC, education, employment | first draft and two revisions | per comprehensive case |

## Key findings

- AI costs about $0.65 (LKR 196) for a comprehensive seven-check case and $0.35 for a standard one, using the most economical model for each step.
- Onboarding a client with an AI-drafted quotation costs about $0.11. Drafting an invoice email and reading a payment slip costs under a tenth of a cent.
- At 200 cases a month, the whole system (AI, hosting, database, email, SMS) runs at about $164 (LKR 49,182) a month. At 50 cases it is about $80; at 600 cases about $395.
- Hosting runs on Netlify's paid plan, provided under a monthly maintenance plan, because the free plan stops the site when its monthly allowance runs out and cannot run background jobs reliably.
- The database starts on Supabase's free tier (500 MB). Moving to Supabase Pro at $25 a month adds 8 GB, 100 GB of file storage and daily backups; we recommend Pro from go-live because the system stores candidates' documents.
- Each comprehensive case saves roughly 3.0 hours of staff work, worth about LKR 2,685, against LKR 196 of AI: about 14 times the cost.

**Verdict: feasible**

The running cost is a small fraction of the value of each verification, every AI step is measured and capped by budget, and the most expensive model is used only where a missed discrepancy would cost the most.

2 · HOW THE AI IS USED

# The cheapest model that does each job well

AI usage is billed by the amount of text and images it reads (input) and writes (output), measured in tokens; a page of a scanned certificate is roughly 1,600 tokens. The system routes every task to the most economical model that does it reliably.

| MODEL | PRICE PER MILLION TOKENS (IN / OUT) | USED FOR |
|---|---|---|
| Claude Haiku 5.5 | $0.10 / $0.50 | Light, high-volume work: classifying uploads, reading slips, short messages and explanations. |
| Claude Sonnet 5.5 | $2.00 / $10.00 | Everyday extraction and drafting: check fields, outreach, QC checklists, quotations, report narrative, the staff assistant. |
| Claude Opus 5.5 | $4.00 / $20.00 | Only where judgement matters most: the Post-QC cross-check and the Super Admin command assistant. |

## Budget-first routing

- Light, high-volume work (classifying every upload, reading payment slips, short messages) runs on Haiku, the lowest-cost model.
- Extraction and drafting run on Sonnet, which balances quality and price.
- Opus is reserved for the final Post-QC cross-check, where a missed discrepancy is costly, and for the Super Admin's command assistant. Either can be switched to Sonnet in Settings to save about 15% per case.
- Fixed instructions are cached, so repeat reads cost about a tenth of the normal price. Non-urgent backlogs can run through Anthropic's batch service at half price.
- Voice notes for the command assistant are transcribed at about $0.003 a minute before the assistant reads them.

**People stay in control**

The AI proposes; staff confirm. It never sets a price, a verification result or an assignee on its own, and every suggestion is shown with an accept, edit or reject choice.

3 · COST PER TASK

# What each AI step costs

Typical document sizes for Sri Lankan certificates, letters and forms. Prices are per unit.

| TASK | MODEL | UNIT | COST |
|---|---|---|---|
| Classify, quality-check and read one page | Haiku 5.5 | page | $0.0007 |
| Extract the fields for one check | Sonnet 5.5 | check | $0.018 |
| Cross-document consistency check | Sonnet 5.5 | case | $0.036 |
| Pre-QC checklist and drafted requests | Sonnet 5.5 | case | $0.028 |
| Verification outreach draft | Sonnet 5.5 | check | $0.011 |
| Turn a reply into a proposed result | Sonnet 5.5 | check | $0.013 |
| Post-QC cross-check and proposed outcome | Opus 5.5 | case | $0.22 |
| Report findings and summary | Sonnet 5.5 | case | $0.060 |
| Tamper and duplicate signals | Haiku 5.5 | case | $0.0008 |
| Instant feedback on a candidate upload | Haiku 5.5 | upload | $0.0003 |
| Plain-language status for client or candidate | Haiku 5.5 | update | $0.0003 |
| Check a photographed consent form | Haiku 5.5 | form | $0.0003 |
| Explain an auto-assignment | Haiku 5.5 | case | $0.0002 |
| Draft a quotation | Sonnet 5.5 | draft | $0.037 |
| Cover email for a quote or invoice | Haiku 5.5 | email | $0.0003 |
| Read a payment slip | Haiku 5.5 | slip | $0.0003 |
| Draft a nudge to a staff member | Haiku 5.5 | nudge | $0.0003 |
| Staff assistant question | Sonnet 5.5 | question | $0.017 |
| Super Admin command (text or voice) | Opus 5.5 | command | $0.063 |
| Daily manager briefing | Sonnet 5.5 | day | $0.030 |
| Transcribe a voice note | Speech-to-text | minute | $0.003 |
| SLA monitoring, auto-assignment rules, performance tracking | No AI | — | $0 |

4 · COST PER CASE

# One case, start to finish

From the first upload to the drafted report, including the candidate's upload page and status updates to the client.

## Comprehensive (7 checks)

Education, employment, address, police clearance, NIC, two references and global sanctions; about 12 pages of documents.

| STEP | QTY | MODEL | COST |
|---|---|---|---|
| Classify, quality-check and read one page | 12 | Haiku 5.5 | $0.008 |
| Extract the fields for one check | 7 | Sonnet 5.5 | $0.12 |
| Cross-document consistency check | 1 | Sonnet 5.5 | $0.036 |
| Pre-QC checklist and drafted requests | 1 | Sonnet 5.5 | $0.028 |
| Verification outreach draft | 7 | Sonnet 5.5 | $0.077 |
| Turn a reply into a proposed result | 7 | Sonnet 5.5 | $0.091 |
| Post-QC cross-check and proposed outcome | 1 | Opus 5.5 | $0.22 |
| Report findings and summary | 1 | Sonnet 5.5 | $0.060 |
| Tamper and duplicate signals | 1 | Haiku 5.5 | $0.0008 |
| Instant feedback on a candidate upload | 12 | Haiku 5.5 | $0.003 |
| Plain-language status for client or candidate | 6 | Haiku 5.5 | $0.002 |
| Check a photographed consent form | 1 | Haiku 5.5 | $0.0003 |
| Explain an auto-assignment | 1 | Haiku 5.5 | $0.0002 |
| **Total per case** | | | **$0.65 · LKR 196** |

With Sonnet for the Post-QC cross-check instead of Opus, this case costs $0.54 (LKR 162).

## Standard (NIC, education, employment)

| STEP | QTY | MODEL | COST |
|---|---|---|---|
| Classify, quality-check and read one page | 6 | Haiku 5.5 | $0.004 |
| Extract the fields for one check | 3 | Sonnet 5.5 | $0.053 |
| Cross-document consistency check | 1 | Sonnet 5.5 | $0.021 |
| Pre-QC checklist and drafted requests | 1 | Sonnet 5.5 | $0.028 |
| Verification outreach draft | 3 | Sonnet 5.5 | $0.033 |
| Turn a reply into a proposed result | 3 | Sonnet 5.5 | $0.039 |
| Post-QC cross-check and proposed outcome | 1 | Opus 5.5 | $0.13 |
| Report findings and summary | 1 | Sonnet 5.5 | $0.036 |
| Tamper and duplicate signals | 1 | Haiku 5.5 | $0.0008 |
| Instant feedback on a candidate upload | 6 | Haiku 5.5 | $0.002 |
| Plain-language status for client or candidate | 5 | Haiku 5.5 | $0.001 |
| Check a photographed consent form | 1 | Haiku 5.5 | $0.0003 |
| Explain an auto-assignment | 1 | Haiku 5.5 | $0.0002 |
| **Total per case** | | | **$0.35 · LKR 105** |

5 · CLIENTS, QUOTATIONS AND INVOICES

# Onboarding a client and billing

Creating the client, its portal login and its packages uses no AI. The AI drafts the quotation and its cover email; prices always come from the price list.

| STEP | QTY | MODEL | COST |
|---|---|---|---|
| Draft the quotation (first draft and two regenerations) | 3 | Sonnet 5.5 | $0.11 |
| Cover email for a quote or invoice | 1 | Haiku 5.5 | $0.0003 |
| **Onboarding a client** | | | **$0.11** |

| PER INVOICE | MODEL | COST |
|---|---|---|
| Cover email | Haiku | $0.0003 |
| Read the payment slip and match it to the invoice | Haiku | $0.0003 |
| **Per invoice** | | **$0.0006** |

## Assistants

- Staff assistant (answers questions about the work each person can see): about $0.017 per question.
- Super Admin command assistant (reach across the whole system, voice or text): about $0.063 per command, plus $0.003 per minute of voice.
- Daily manager briefing: about $0.030 a day.

6 · MONTHLY RUNNING COST

# Three volumes, all costs included

Forty percent comprehensive cases, the rest standard. Includes AI, hosting, database, email, SMS reminders to candidates and voice transcription.

| PER MONTH | STARTER | GROWTH | SCALE |
|---|---|---|---|
| Cases a month | 50 | 200 | 600 |
| AI: cases | $23.54 | $94.18 | $283 |
| AI: quotations and invoices | $0.36 | $1.01 | $2.01 |
| AI: assistants and briefings | $10.54 | $21.87 | $39.91 |
| Netlify Pro (hosting) | $20.00 | $20.00 | $20.00 |
| Supabase Pro (database, files, backups) | $25.00 | $25.00 | $25.00 |
| Email (Resend) | Free tier | Free tier | $20.00 |
| SMS to candidates | $0.45 | $1.80 | $5.40 |
| Voice transcription | $0.045 | $0.090 | $0.15 |
| **Total (USD)** | **$80** | **$164** | **$395** |

| IN RUPEES | | | |
|---|---|---|---|
| Total per month | LKR 23,984 | LKR 49,182 | LKR 118,504 |
| AI per case on average | LKR 141 | LKR 141 | LKR 141 |

Assumptions per month: Starter — 3 new clients, 200 assistant questions, 100 commands, 15 voice minutes; Growth — 8 new clients, 500 assistant questions, 200 commands, 30 voice minutes; Scale — 15 new clients, 1200 assistant questions, 300 commands, 50 voice minutes. Three SMS reminders per case. The hosting maintenance plan is quoted separately.

7 · HOSTING AND SERVICES

# Where the system runs

Three managed services run the system. None needs servers of your own.

## Netlify: the application, on a maintenance plan

The application and its background workers run on Netlify. Netlify's free plan stops a site when its monthly allowance is used up, which a business system cannot risk, so the system runs on a paid plan (Netlify Pro, about $20 a month; 3,000 credits a month; background jobs and scheduled tasks; automatic top-ups so the site is never paused).

> **Maintenance plan**
>
> Hosting is provided under a monthly maintenance plan, quoted separately. The plan covers the Netlify hosting, monitoring, security and dependency updates, backup checks and support.

## Supabase: database, sign-in and document storage

| PLAN | MONTHLY | WHAT YOU GET |
|---|---|---|
| Supabase Free | $0 | 500 MB database, 1 GB file storage, pauses after a week without activity, no backups |
| Supabase Pro | $25 | 8 GB database, 100 GB file storage, daily backups, never pauses; includes a $10 compute credit |

We include 500 MB of free Supabase data storage to start. Each case stores about 8 MB of documents and reports, so at 50 cases a month the free 1 GB of file storage lasts about 2.6 months. Upgrading to Pro ($25 a month) removes that limit for years and adds daily backups. Because the system holds candidates' personal documents, we recommend Pro from go-live.

## Email, SMS and transcription

- Email through Resend: free for up to 3,000 emails a month (100 a day); $20 a month for 50,000. The Starter and Growth volumes fit the free tier.
- SMS reminders through Notify.lk or a similar gateway: about LKR 0.65–1.00 per message at local gateway rates, paid per message.
- Voice transcription for the command assistant: about $0.003 a minute.
- Domain: the system runs on a sub-domain of Ontriq's existing domain (for example crm.ontriq.lk) at no extra cost.

8 · FEASIBILITY

# What the AI saves on every case

Minutes of staff time on a comprehensive case, before and after the AI takes on the reading, drafting and chasing. Staff still review and confirm every step.

| ACTIVITY | BEFORE (MIN) | WITH AI (MIN) | SAVED |
|---|---|---|---|
| Data entry from documents | 15 | 4 | 11 |
| Pre-QC document review | 20 | 8 | 12 |
| Drafting verification outreach (7 checks) | 70 | 14 | 56 |
| Recording responses and results (7 checks) | 56 | 21 | 35 |
| Writing the report findings | 45 | 10 | 35 |
| Chasing candidates for documents | 20 | 2 | 18 |
| Status calls and emails from clients | 15 | 3 | 12 |
| **Per comprehensive case** | **241** | **62** | **179 min** |

STAFF TIME SAVED

**3.0 h**

per comprehensive case

VALUE OF THAT TIME

**LKR 2,685**

at LKR 900 an hour

AI COST

**LKR 196**

14× return

## Beyond the hours

- Faster turnaround: candidates upload through a guided link with instant feedback, and outreach goes out the day a case opens.
- Fewer QC returns: documents are checked for readability and consistency on upload, before a person looks at them.
- Fewer missed discrepancies: the Post-QC cross-check reads every check against its evidence.
- Fewer status calls: clients see each check's progress in their portal.

The staff cost per hour and the minutes saved are planning assumptions; replace them with Ontriq’s own figures to restate the return.

9 · COST CONTROLS

# Spend that can't run away

- Every AI call is recorded with its model, tokens and cost, and attributed to the client, case and feature that caused it.
- The AI page in Settings shows spend by day, feature, model and client, next to the estimates in this document.
- Daily and monthly budgets per feature send an alert or pause the feature when reached. The command assistant has its own daily cap.
- Each AI feature can be switched off, or moved to a cheaper model, without a code change.
- Clients can opt out of AI processing entirely; their cases are then handled manually.
- A background job that fails repeatedly is stopped rather than retried forever, so a fault can never loop on paid calls.

10 · ASSUMPTIONS AND SOURCES

# How these numbers were made

- List prices checked on 29 October 2026. Exchange rate USD 1 = LKR 300. Taxes on foreign services are not included.
- A scanned page is about 1,600 tokens; a comprehensive case has about 12 pages, a standard case about 6.
- Forty percent of cases are comprehensive. 8 MB of files per case.
- Usage figures for assistants and briefings are estimates; they are the easiest line to control with budgets.
- Prices change. The system's usage dashboard measures the real cost from the first case, and this document is regenerated from the same model.
